13 ABOUT ALGIERS

The history of Algeria dates back to prehistoric times with ancient civilizations such as the Aterian discovered at Bir el-Ater in the Nementcha region, then the Capsian civilization and the rich rock carvings of Tassili n'Ajjer which testify to a once fertile Sahara. In Antiquity, the arrival of the Phoenicians led to the creation of trading posts such as Hippo and Algeria saw the emergence of the Numidian kingdom led by famous kings such as Massinissa and Jugurtha, before coming under Roman and then Byzantine domination. With the arrival of Islam in the seventh century, great Muslim dynasties succeeded one another and developed important religious and cultural centres such as Tlemcen and the famous Kalâa of the Beni Hammad, a World Heritage Site. Historical Islamic monuments bear witness to this period, including the Djamaa El Kebir and the Sidi Okba Mosque. From 1518, Algeria came under the authority of the Ottoman Empire until the French occupation began with the landing at Sidi Fredj in 1830. The national resistance was led by historical figures such as Emir Abdelkader, before the revolution of 1 November 1954 led to the independence proclaimed on 5 July 1962. Since then, Algeria has continued to build its modern state while preserving a rich historical and Islamic heritage that reflects the different civilizations that have marked its territory.
